# OUTPUT:

The screenshot displays the Remix IDE interface, which is used for developing, deploying, and running smart contracts. The interface is divided into several panels:

- Left Panel (Deploy & Run Transactions):** This panel contains settings for the deployment environment. It shows the environment as 'Remix VM (Shanghai)', the account as '0x5B3...eddC4 (99.999999%)', the gas limit as '3000000', and the value as '0 Wei'. The contract selected is 'FoodTracking - Food tracking system'. There are buttons for 'Deploy', 'Publish to IPFS', and 'At Address'.
- Top Panel (Code Editor):** This panel shows the Solidity code for the 'FoodTracking' contract. The code includes functions for verifying, consuming, and getting details of food items. The line numbers range from 80 to 104.
- Bottom Panel (Transactions and Debug Console):** This panel shows the results of the deployment. It indicates that the contract was successfully deployed to the address '0x5B3...eddC4'. The debug console shows the transaction details, including the gas used (0), the value (0 wei), and the hash (0x178...406b9).

```
